

AMIT KUMAR

React Native Developer | Mobile App Developer | India | +91 8292544765 | [Email](#) | [GitHub](#) | [LinkedIn](#)

React Native Developer with experience shipping production apps across iOS, Android, and Web, with a track record of independently building Android products reaching 240K+ combined active users.

PROFESSIONAL EXPERIENCE

Lead React Native Developer | [Destya Studio](#) (Remote) | **Jul 2024 - Present**

- Built real-time shared sessions with Firebase Realtime Database, synchronizing game states and user interactions.
- Architected and shipped 5+ **production apps** across iOS, Android, and Web.
- **Designed and implemented CI/CD pipelines with GitHub Actions and Expo EAS**, automating production builds and deployments to Google Play Internal Testing and App Store Connect/TestFlight.
- Developed interactive, multi-mode experiences using React Native, Redux, and custom animations.
- Implemented offline caching with AsyncStorage and production monitoring with Firebase Crashlytics.
- Integrated LLM APIs for AI-powered features and used Gemini CLI for development, debugging, and code reviews.

Civil Services Candidate | **Bihar Public Service Commission (BPSC)** | **Jan 2022 - Jul 2024**

- Qualified for the BPSC Mains Examination in 3 consecutive attempts.
- Returned to software development with a focus on React Native, TypeScript, and modern full-stack development.

Independent Android Developer | **Almanac Explorer** | **Jul 2018 - Dec 2021**

- Independently built, published, and maintained consumer Android apps using Java and XML, managing development through Google Play distribution.
- Grew two apps to 240K+ combined active users, with the flagship reaching 177K+ users and 54M+ tracked events.
- Acquired 145K+ users organically through Google Play and integrated Firebase Analytics and mobile monetization to track acquisition and engagement.

KEY PROJECTS [android](#) | [ios](#) | [web](#)

- [Question Games](#): Engineered real-time multiplayer sessions using Firebase Realtime Database to synchronize game states and user interactions.
- [Trivia Quest AI](#): AI-powered quiz platform leveraging LLM APIs for question generation, explanations, and progress tracking.
- [CodeRespite](#): Personal portfolio and technical hub built using Next.js, Redux, and Tailwind CSS.

SKILLS

- **Languages:** TypeScript, JavaScript (ES6+)
- **Frameworks:** React Native, React, Next.js, Node.js, Express, Redux, Tailwind CSS
- **Mobile & Cloud:** Firebase, AsyncStorage, Crashlytics, Android Studio, Xcode
- **Tools:** MongoDB, Git, Gemini CLI, Google Play Console, App Store Connect
- **AI:** LLM API Integration, Prompt Engineering, AI-Assisted Development

EDUCATION

- **B.Tech, Computer Science:** Aryabhatta Knowledge University, Patna (2014-2018) (CGPA: 8.21).
